SUMMARY

I'm Abhishek Tripathi, a 2024 B.Tech AIML graduate from NIET, Greater Noida. After graduation, I took a focused break to strengthen my technical foundations through advanced coaching in Java, SQL, and frontend development. During this time, I built real-world projects like an AI Poem Generator using Gemini API and a Myntra clone. I'm now ready for entry-level or internship roles where I can contribute immediately with strong frontend skills (React, JavaScript, HTML/CSS) and solid backend knowledge in Java and SQL.

SKILLS

HTML **CSS** **JAVASCRIPT** **REACT.JS** **REDUX.JS** **JAVA** **SQL**

GIT/GITHB

EXPERIENCE

Full Stack Developer (Trainee)

QSpiders - Software Testing Training Institute

📅 08/2024 - Present 📍 Noida, India

- Practiced daily coding in Java, SQL, and React.js as part of a structured coaching program
- Built full-stack apps with complete frontend/backend integration
- Participated in live project simulations and team-based development tasks
- Strengthened skills in version control, debugging, and clean code practices

PROJECTS

AI Poem Generator with Gemini API using JavaScript and React.js

📅 01/2025 - 05/2025

- Real-time Gemini-powered poetry generation
- User prompt input field for custom creative expression
- Modular component-based React architecture
- Live-updating digital clock without page reload
- Separated API logic for better code organization & security awareness

Gaming Portal Website (A multi-game website where you can play different game made by me)

📅 11/2024 – 03/2025

- A modern, responsive web platform featuring multiple browser games – play, complete, and track your favorites all in one place.
- Multiple Games: Includes Snake, Flappy bird, Rock-Paper-Scissors, Hangman, Memory Match, and Typing test.

Personal Portfolio Website

📅 05/2022 – (it's been updated every time)

- Built and deployed interactive portfolio showcasing all projects.
- Revamped personal portfolio to address user engagement, utilizing modern design principles, resulting in a 90% increase in visibility.

Staff Operation System

📅 09/2023 - 02/2024

- Employee management system with JAVA and CRUD functionality
- Optimized backend SQL queries for data reliability and speed
- Built responsive UI with real-time interaction handling

Myntra Clone website

📅 07/2024 - 12/2024

- Created dynamic product pages, cart Myntra clone.
- Designed a responsive user interface and improving performance and reducing response times by 30%.

EDUCATION

Bachelor of Technology - BTech, Artificial Intelligence and Machine Learning

Noida Institute of Engineering & Technology

📅 07/2020 - 07/2024
